(54) Title: DRAWER COMBINATION OF DRAWER CABINET AND DRAWER AS WELL AS AIRCRAFT OR TRAIN PROVIDED WITH SUCH A COMBINATION

(57) Abstract: The invention relates to a drawer comprising a bottom surface (11), two opposing side walls (12,13) and a top surface (14). The side walls are each provided at the top with a recess (15) that extends over the entire side wall, is open towards the outside of the drawer and is delimited from above by a support body (16). Viewed in the vertical direction, the recesses are a recess distance (x) away from the top surface. Viewed in the horizontal direction, the outsides of the support bodies have an external support body spacing (v). The sidewalls are each provided with a supporting foot (17) that extends along the entire sidewall. Viewed in the vertical direction, the supporting foot extends to a supporting foot depth (y) below the bottom surface. Viewed horizontally, the insides of the supporting feet have an internal supporting foot spacing (w). The internal supporting foot spacing (w) is greater than the external support body spacing (v) and the supporting foot depth (y) is greater than the recess distance (x). The invention furthermore relates to a combination comprising at least one drawer according to the invention as well as a drawer cabinet. Furthermore, the invention relates to an aircraft provided with a combination according to the invention.
